REASONS FOR ALLOWANCE

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: As per claim 1, the prior art fails to teach the combination of a housing with rails and pans for storing food and water and a water chilling system including a compressor, water reservoir with a cooling coil disposed therein, a plurality of pipes channeling the chilled water out of the reservoir and into tubes for positioning for cooling the food products therein. As per claim 8, the prior art fails to teach the invention as described above in combination with a plurality of clamps attachable to the tubes for selectively controlling the water flow. As per claim 14, the prior art fails to teach the invention as described above in combination with a plurality of thermometers connectable to the pans for displaying temperature.

Although Williams (US 3,908,749) teaches the combination of a food storage cart (10) with rails (20 and 21) and pans (18) with a chilled air unit (52) for providing chilled air into the volume of the food storage cart, Williams fails to teach a water chilling system including a reservoir and plurality of pipes for circulating the chilled water to cool the volume of the storage area.

Although Perez et al. (US 4,280,335) teach a combination of cooling system (Figure 1) and food storage compartments with a plurality of pipes (32) that circulate the chilled water to food storage areas (54), Perez et al. fail to teach a vapor compression refrigeration system chilling the circulated water, as their cooling system is merely an ice maker. Perez et al. also fail to teach a small scale system preferable to a storage cart, as their system is for an entire supermarket.

Although Halterman et al. (US 5,797,270) teaches the combination of a chilling device meant to thaw frozen meat and a small food storage compartment (20), Halterman et al. fail to teach the chilled water circulating through a plurality of tubes, as their device has the food in direct contact with a large volume of water.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

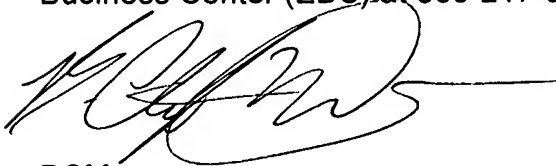

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Ohkawara (US 6,508,068) teaches a chilling system; Perman (US 2,197,315) teaches a central cooling system; and Carr (US 2003/0182949) teaches a system circulating an aqueous solution.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Clayton McCraw whose telephone number is (571) 272-3665. The examiner can normally be reached on M-F 8:30AM-5:00PM.
